I very reluctantly decided to go to Total Health. After 2 years of trying every option that was presented to me by wonderful physicians (shots in the back, traditional physical therapy, water traction, pain killers) which had worked so perfectly on the right side of my body, they all told me the only real option for my left side was minimally invasive surgery (hah!).

A key tip to higher productivity is to schedule regular breaks. Working non-stop leads to burnout and a dramatic drop in productivity. Make sure that not only do you get adequate sleep and off time during the week, but also that you have break times during the day. You can use your breaks to either switch off and take your mind off your current project or grab a coffee and bond with a colleague.
