A dialysis catheter is a catheter used for exchanging blood to and from a hemodialysis machine and a patient.. The dialysis catheter contains two lumens: venous and arterial. Although both lumens are in the vein, the "arterial" lumen, like natural arteries, carries blood away from the heart, while the "venous" lumen returns blood towards the heart.

Dialysis catheter - Wikipedia

Hemodialysis is a treatment used when your kidneys fail (Stage 5 Kidney Disease) and can no longer clean your blood and remove extra fluid from your body. A hemodialysis access or vascular access is a way to reach your blood for hemodialysis. If you receive hemodialysis, your access is one of the following:

INTRODUCTION. Central venous catheter infections are common. In the United States, approximately 80,000 central venous catheter-related bloodstream infections occur in intensive care units each year [1]. In general, treatment of systemic intravenous catheter-related infection requires determination regarding catheter management (eg, salvage, exchange, or removal) and antibiotic therapy (eg ...

A. central line is known by multiple names ie. central venous catheter or central venous line.. There is also a variation of the traditional central line which most commonly enters via the neck/chest or the groin called a peripherally inserted central venous catheter (PICC line) which most commonly enters via a vein in the upper arm.

Central Line - LA Vascular

In medicine, a catheter is a thin tube made from medical grade materials serving a broad range of functions. Catheters are medical devices that can be inserted in the body to treat diseases or perform a surgical procedure. By modifying the material or adjusting the way catheters are manufactured, it is possible to tailor catheters for cardiovascular, urological, gastrointestinal, neurovascular ...

Catheter - Wikipedia

Peripherally inserted central venous catheter (PICC) A PICC is a 50-60 cm long CVAD made from either silicone or polymer. A PICC can be inserted in the radiology department, operating theatre, patient's bedside or a unit procedure room; usually under local anaesthesia.
