In our code we have used mutex also for synchronization purposes. The Thread which locks the mutex again tried to lock the mutex. Then it goes to blocked state. What we have seen is that we are able to unlock this from another thread. Thus achieving synchronization between the two. We are using posix standard only. So the major difference cited between mutex and binary semaphore seems vague ...

By Tricia Brown. Carrying a cellphone has become as commonplace as it once was to carry a wallet or a purse, perhaps even more so. In 2014, 81 percent of American adults who owned smartphones used a short messaging service (SMS). Texting seems to be the preferred form of everyday communication for many, so it only seems logical to explore the various ways churches can utilize this technology.
