"wk M (AI-LA ,\ \ New arm; Coqu w) a area-no 5 ~73 4. There are also a few important differences between DNA replication and transcription. Fill in the blanks in the following table ...

**t\_t\_answer\_key - Master Your Classes™ | Course Hero**

The mechanism of transcription has parallels in that of DNA replication. As with DNA replication, partial unwinding of the double helix must occur before transcription can take place, and it is the RNA polymerase enzymes that catalyze this process. Unlike DNA replication, in which both strands are copied, only one strand is transcribed.

**Transcription, Translation and Replication - ATDBio**

What's the difference between Transcription and Translation? Transcription is the synthesis of RNA from a DNA template where the code in the DNA is converted into a complementary RNA code. Translation is the synthesis of a protein from an mRNA template where the code in the mRNA is converted into an amino acid sequence...
