Cardiac output Cardiac output (known as 'Q') is a measure of the amount of blood that is pumped out of the heart in one minute. 'Q' specifically refers to the amount of blood pumped out of the left ventricle as this is the ventricle that supplies blood to the muscles and organs of the body.

Cardiac Output and Blood Pressure — PT Direct

Although cardiac output is measured as the flow of blood from the left ventricle into the aorta, the system that controls cardiac output includes many other components besides the heart itself. The heart's rate of output cannot exceed the rate of venous return to it, and therefore, the factors governing venous return are primarily responsible for control of output from the heart.
