Engineering Economics . The essential idea behind engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

It's the beginning of the school year, and that means it's time to teach place value. Right!? It seems that this is the time of year that every single teacher, no matter the grade, is doing some sort of place value review.

Teaching With a Mountain View: Decimal Place Value ...

Moneyness is a term describing the relationship between the strike price of an option and the current trading price of its underlying security. In options trading, terms such as in-the-money, out-of-the-money and at-the-money describe the moneyness of options.. In-the-Money (ITM) A call option is in-the-money when its strike price is below the current trading price of the underlying asset.
