### **Answers For Prove It Powerpoint**

In short and in theory, this is possible. Microsoft Office uses a scripting language called Visual Basic For Application (VBA) to allow you to perform some relatively powerful tasks like manipulating objects within PowerPoint and pull/update information from external sources like an Access database or SQL server using an already available package called ADO.

### **automation - Query data in Powerpoint - Super User**

My Powerpoint presentation contains some shapes (arrows and circles) and i'd like to use animations to change their outline and fill colors. The problem i am facing is that i want to change the colors multiple times, but each time i insert a new animation it overrides my old ones for this shape.
