Summer And Winter Gizmo Answer

Summer and Winter. Observe the tilt of Earth's axis and the angle that sunlight strikes Earth on June 21 and December 21. Compare day lengths, temperatures, and the angle of the Sun's rays for any latitude. The tilt of the Earth's axis can be varied to see how this would affect seasons.

Summer and Winter Gizmo : Lesson Info : ExploreLearning

Why We Have Winter and Summer We have winter and summer because the Earth circles around the sun. While many believe the temperature changes occur because the Earth is closer to the sun in summer and farther away from the sun in winter, the Earth is actually farther from the sun in summer and closer to the sun in winter. The temperature changes are actually caused by the tilt of the Earth ...
