In an Excel 2010 file, there are about 100 rows containing data, but the whole work sheet displays 1048576 blank rows (making the file about 2.5 mb). I need to delete blank rows after the data. But

Deleting unwanted rows in Excel worksheet - Super User

UPDATE: I could be off-base here, but I think the problem may simply be that you don't have enough fine-grained control over what Excel is doing when it saves a CSV file. As I recall, by default it does not place quotes around values unless they are needed to qualify a discrete cell that may contain data that would otherwise mess up the CSV format.

How to force quotes in every field while saving an excel ...

I agree with the comments - some sample data would help as well as specifying more precisely how you want to flag rows for checking. BUT In general, if you have the same layout for each excel worksheet, I recommend comparing excel data by

Subscripts inside Excel formulae - Super User

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

How to Write Guide: Sections of the Paper - Bates College

Password requirements: 6 to 30 characters long; ASCII characters only (characters found on a standard US keyboard); must contain at least 4 different symbols;

Join LiveJournal

There are three parts to PALS sessions in which the partners take turns reading and describing what they read to each other.. Task 1: Partner Reading - the higher-achieving student reads aloud while their partner follows along correcting mistakes. After five minutes the students switch roles and reread the same selection.
