What if this 4°C increase is not avoided? A world in which warming reaches 4°C above preindustrial levels, would be one of unprecedented heat waves, severe drought, and major floods in many regions, with serious impacts on human systems, ecosystems, and associated services. A global mean temperature difference of 4°C is close to that between the temperatures of the present day and those of ...

WORK Suppose that, a force is applied an object and object moves in the direction of applied force then we said work has done. Let me explain in other words. There must be a force applied to an object and object must move in the direction of the applied force. If the motion is not in the direction of force or force is applied to an object but there is no motion then we cannot talk about work.
