The Turing test, developed by Alan Turing in 1950, is a test of a machine's ability to exhibit intelligent behaviour equivalent to, or indistinguishable from, that of a human. Turing proposed that a human evaluator would judge natural language conversations between a human and a machine designed to generate human-like responses. The evaluator would be aware that one of the two partners in ...

Each time this page is loaded it should automatically clear out any previously opened pop-up windows. If, for some reason it does not, close any pop-up windows that may have been previously generated by the SAGE test, especially if reloading/retaking the test. Once you leave this page the script has no way of knowing if there are windows created by previous sessions.
