A hypothesis (plural hypotheses) is a proposed explanation for a phenomenon. For a hypothesis to be a scientific hypothesis, the scientific method requires that one can test it. Scientists generally base scientific hypotheses on previous observations that cannot satisfactorily be explained with the available scientific theories. Even though the words "hypothesis" and "theory" are often used ...

Standpoint theory is a theory found in some academic disciplines which is used for analyzing inter-subjective discourses. This body of work proposes that authority is rooted in individuals' knowledge (their perspectives), and the power that such authority exerts.. Standpoint theory's most important concept is that an individual's own perspectives are shaped by his or her social and political ...
