Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Are faith and belief in evolution necessarily at odds? According to Pope Francis, the answer is no. Indeed, the pope recently reaffirmed the Roman Catholic Church's view that "evolution in nature is not inconsistent" with church teaching on creation, pushing the debate on human origins back into the news.. Although most U.S. Catholics accept the idea of evolution in some form, a ...
