The Labrador Retriever, or just Labrador, is a large type of retriever-gun dog. The Labrador is one of the most popular breeds of dog in Canada, the United Kingdom and the United States.

### **Labrador Retriever - Wikipedia**

Last chance for Animals is a national, non-profit organization dedicated to eliminating animal exploitation through education, investigations, legislation, and media attention. The organization believes that animals are highly sentient creatures who exist for their own reasons independent of their service to humans; they should thus not be made to suffer for the latter.

Bio-inspired robotic locomotion is a fairly new subcategory of bio-inspired design. It is about learning concepts from nature and applying them to the design of real-world engineered systems. More specifically, this field is about making robots that are inspired by biological systems. Biomimicry and bio-inspired design are sometimes confused. Biomimicry is copying the nature while bio-inspired ...

Start telling people their dogs are dangerous and you're likely to begin an uproar; the fact is, however, dog attacks do occur and even against the dogs' owners. The following fifteen dogs are among the most dangerous breeds evidenced by statistics that include attacks on the owners.

### **25 dangerous dog breeds most likely to turn on their ...**

This article directly addresses the scientific evidences in favor of macroevolutionary theory and common descent. It is specifically intended for those who are scientifically minded but, for one reason or another, have come to believe that macroevolutionary theory explains little, makes few or no testable predictions, or cannot be falsified.

Scientists are usually quite reserved people who intelligently do their work. You know the stereotypes. They wear lab coats and work within reach of dusty chalkboards scrawled with formulae, their brains buzzing beneath their chaotic hair. Oh, and sometimes, they change the world. However, not every ...
