1. Solving for a single variable in a first degree equation. In an equation such as $a = b / c$ being able to solve for a, b, or c correctly is extremely important. The most common mistake in this situation is thinking that the solution in the case of solving for c is not recognizing that $c = b / a$. Way too often students think that the value for c is equal to a / b .

'knowledge of nature', from φύσις phýsis "nature") is the natural science that studies matter, its motion, and behavior through space and time, and that studies the related entities of energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is ...

Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Because light is an electromagnetic wave, other forms of electromagnetic radiation such as X-rays, microwaves, and radio waves ...

In the sciences generally, time is simply what a clock reads, but this hides a whole host of different conceptions of time used in physics. Physics is the only science that explicitly studies time, but

even physicists agree that time is one of the most difficult properties of our universe to understand. Even in the most modern and complex physical models, though, time is usually considered to ...
