Abstract Day and night airborne thermal infrared image data at 5 m spatial resolution acquired with the 15-channel (0.45mum-12.2mum) Advanced Thermal and Land Applications Sensor (ATLAS) over Alabama, Huntsville on 7 September, 1994 were used to study changes in the thermal signatures of urban land cover types between day and night. Thermal channel number 13 (9.60 mum-10.2mum) data with the ...

I just upgraded to Windows 10, and I noticed that several of my applications are using the wrong resolution (for example, Spotify's window is super big, and the text is oversized and blurry). However, the Windows ui is scaled correctly, as is Google Chrome, Edge, and the Control Panel/Settings Windows.

Abstract. The application of high resolution electron backscatter diffraction (HR-EBSD) techniques has been used in order to study the evolution of geometrically necessary dislocation (GND). The tested materials were taken from AZ31 magnesium sheet which had strong basal texture. Because of low symmetry of the magnesium crystal lattice,...

Application of high resolution ICP-AES to selected problems of importance in the nuclear industry is a growing field. The advantages in sample preparation time, waste minimization and equipment cost are considerable. Two examples of these advantages are presented in this paper, burnup analysis of spent fuel and analysis of major uranium isotopes.

Resolutions of Remote Sensing 1. Spatial (what area and how detailed) 2. Spectral (what colors - bands) 3. Temporal (time of day/season/year) 4. Radiometric (color depth) Spatial Resolution describes how much detail in a photographic image is visible to the human eye. The ability to "resolve," or separate, small details is one way of ...

High Resolution Melt. It was discovered and developed by Idaho Technology and the University of Utah. It has advantages over other genotyping technologies, namely: It is cost effective vs. other genotyping technologies such as sequencing and TaqMan SNP typing. This makes it ideal for large scale genotyping projects.
