The usual colour of a breastfed baby's poo is mustard or yellow. Plenty of soft yellow poop after day five of life shows your baby is drinking plenty of breast milk (see Breastfed Baby Poop for a review of what to expect in your baby's nappy in the early weeks). A green poo on day three of life is normal.

It is very common for babies to be fussy and nurse very often in the evenings, particularly in the early months. My daughter had a fussy time every evening for a couple of months (yes, it does go away!). I spent weeks camped out on the end of the sofa with a constantly nursing and/or fussy baby every evening from about 6 to 10 PM...

Lactation describes the secretion of milk from the mammary glands and the period of time that a mother lactates to feed her young. The process can occur with all post-pregnancy female mammals, although it predates mammals. In humans the process of feeding milk is also called breastfeeding or nursing. Newborn infants often produce some milk from their own breast tissue, known colloquially as ...
