Thermostatic Mixing Valves - Water Control | Zurn

For ASSE 1017 (Master Mixing), the valves are tested according to the standard default, which is based on the flow with 10 psi differential, followed by a flow rate reduction of 50%. For ASSE 1070 (Lavatory Tempering), the advertiser must present to the test lab a brochure showing their advertised minimum because there is no default flow rate.

What Engineers Need to Know About the ASSE Standards and ...

MODEL TMM-1070® Under-the-Counter Mechanical Mixing Valve - Type T Product Description
Lawler's TMM-1070® thermostatic mechanical mixing valve provides a basic solution for mixing hot and cold water at the point-of-use and features a high temperature limit stop designed to shut down water flow above 120°F.
