### **Answers To Biology How Populations**

Best Answer: The reason there is a lag time is pretty easy to explain. The hare population grows, providing more food for the lynx population. More mother lynx have kittens who survive and grow to adulthood. The lag time is caused between the difference in the reproduction rate of the predator as opposed to ...

## Help with biology (populations?) ? | Yahoo Answers

Biology 5.1: How Populations Grow. Say you have one bacterium that devides every 10 min. After the first 10min, you'll have 2 bacteria and each will divide again so by the end of 20 min you'll have 4. By the end of 30min you'll have 8 bateria. This can be written exponentially as 2 to the power of 3 or 2^3(since 30 min or 3 dividing periods went by)
