# Chemical Bonding Pogil Answer Key - skylinefinancialcorp.com

Electronegativity If two atoms come together to form a bond, the atom with higher electronegativity will attract the electrons away from the atom with lower electronegativity. The degree to which the electrons are attracted to the more electronegativity atoms depends on the difference in electronegativities.

15 Chemical Bonding POGIL. Activity 8 – No metals... Objective: • Given a covalent compound's name, be able to give the proper chemical formula for the compound. • Given a covalent compound's chemical formula, be able to give the proper name for the compound.

# Bonding POGIL 2011 - Region 11 Math and Science

Chemical Bonding POGIL. When a Group IIA metal forms a cation, it will always form a +2 charge. However, as we progress into the transition metals we find that these metals can form cations with different charges under different circumstances. Use the Model below to develop some rules that describe how to communicate the charge of the cation.
