The Mole Lab Answer Key

The answer to each part of question #13 should be the same and equal to answer #2. Question #19 should relate to the small size of the atom and the need for a large number of them in order for them to be seen and measured. The answer to question #19 is C-12, the reference isotope for atomic masses.

Mole Lab Answer Key - fullexams.com

Mole Lab Answer Key. May 21, 2018. I've been told that answering services go back farther than even would have suspected. The stories I've heard through the many years led me to believe that cord-boards and voice pagers had been the beginning. This informative article was inspired by an amazing story I was recently told.

Mole Lab Answer Key - Answers Fanatic

The word mole comes from the Latin word for mass, and means a standard amount. One mole contains $6.022 \times 10~23$ atoms and has a mass equal to the element's relative atomic mass expressed in grams. Prelaboratory Assignment \square Read the Introduction and Procedure before you begin. \square Answer the Prelaboratory Questions.
