Found a second defaults directive file . This is caused by the [defaults] directive appearing more than once in the topology or force field files for the system - it can only appear once. A typical cause of this is a second defaults being set in an included topology file, .itp, that has been sourced from somewhere else.For specifications on how the topology files work, see GROMACS Manual ...

Thanks, i can confirm both of the above is OK. Thanks for your idea relating to the default domain policy. I am wanderting if it is an issue with the VMWare server builds, as they were all deployed from the same Virtual machine template (which i didnt build) however i did build the two physical ones from scratch.
