The Biology of Business Speaker. Resolve individual and organizational pain points in ethics, diversity, and company culture by working with natural behaviors, not against them. This is business, evolved.

Biology of Business Expert: Keynote Speaker Dr. Rebecca Heiss
I think the point here is that we expect the typeof operator to return a string so using the strict equality check is technically more accurate, more specific, and faster. So really, there is no reason to use the loose comparison, not the other way around. Also val !== null is perfectly valid in many cases - I do it all the time. I agree with your non-conformity argument, but I think this is a ...

Is there a standard function to check for null, undefined ...
